

# THE EXPRESS

VOLUME XXIII. NO. 2

EMPRESS, ALTA. THURSDAY, June 6th, 1935

Price: \$2.00 Per Year.

## United Church

Sunday, June 9th, Anniversary Sunday

Sunday School, 10:30 a.m., Church Service, 11:30 a.m.

Bindloss, 2.00 p.m.

Social Plains, 4.00 p.m.

Rev. A. J. Law, B.A., Pastor

## Ottawa

May 30th, 1935

Magistrates will in future not have the option of imposing a fine or suspended sentence on a man found to be intoxicated in charge of a car. A jail sentence will be obligatory. When a man is drunk? This was discussed at some length. One member said some magistrates seemed to think a man was sober if he could stand on his feet. The same member claimed that after one drink a man was unable to act quickly. Although this member was 68 years old he had never taken his first drink for this removed loud applause. However, it was decided that in view of the many serious accidents, no motor roads, the drunken driver should go to jail, and the clause passed.

Canada's Note issue is now in the hands of the Governor of the Bank of Canada. The government will issue no currency [sic notes] in the future and the right to issue will be slowly withdrawn. It is thought that the rate of 5 per cent per year for 5 years and 10 per cent per year for the next 5 years. Valued at \$20.67 per ounce the Government turned over to Mr. Tatars \$71,000,000 in gold and the banks turned in \$36,000,000 worth. The notes issued will be based on this gold and will have a coverage of 45 p.c., whereas the statutory coverage is only 25 p.c.

Regardless of all the rumors about the Conservative leadership, it seems likely that Mr. Bennett will continue His color looks good, he walks with his old-time stride and he has the assurance of British and Canadian heart specialists that there is no organic trouble.

The breach between the P.M. and Mr. Stevens seems to be widening. Mr. Stevens spoke in the House on two occasions this week, and each time a disagreement, expressed in some hot words developed. Mr.

## Bindloss Notes (Too late for last week)

Mrs. John Fowles and Mrs. Silverthorne of Social Plains, were in Calgary attending the convention of the Women's Institute, under the auspices of the Acadia Valley Women's Institute, a number of young people from Acadia Valley, came to Bindloss, Friday, May 17, and presented a play, "The Little Clodhopper" which was greatly enjoyed. The cast of characters was as follows:

Mrs. Juliette Bean, boarding housekeeper, at Spillertown . . . Mrs. Leech Ode Gump, her maid . . . Freddie Peers Mr. Green, a high-powered engine . . . Raymond Cairn Judy Elliott, The Little Clodhopper . . . Katherine Graham Mrs. Chilvers-Boggs . . . Mrs. Graham George Chilvers-Graham, her son . . . Stanley Gallo Charmaine Carter, an actress, George's sweetheart . . . Evelyn Halland Miss Maxine Sutherland and Mr. Pete Spanan assisted with singing and music.

(owing to lack of space and time, this week's notes are left over to next issue)

## Record Time Across Atlantic

The Normandie, the new French liner the biggest ship afloat, completed her maiden voyage across the Atlantic this week in the record time of 107 hours and 33 minutes. The boat sailed from Le Havre to Southampton and from there to New York. The Normandie is 1027 feet long, her engines are estimated as being powerful enough to generate electricity for a city and a half times the size of Vancouver.

Stevens was the chief critic of the Patents' Act that Mr. Cahan was fathoming, so the Government members were being divided into two camps although it seems that the great majority are remaining loyal to Mr. Bennett, and still hoping for peace.

Mr. Bennett's position is one of obvious difficulty. He does not wish to imperil his span of life by carrying on and no one would even hint that he should. At the same time, he does not wish to leave without making the leadership safe, sane, orthodox hands certain to maintain the traditions of the party to which he belongs.

The wheat crop is in poor condition, the yield is expected to be 23,500,000 bushels in 1935. The total will not be realized. In fact, the Winnipeg Free Press suggests the acreage will be about 21,000,000 or 22 million acres less than last year. On the prairies, moisture conditions are good and warm weather is needed. - Wheat Pool Budget.

The world is invited to attend the annual Rose Festival, to be held at Portland, Oregon, June 7 and 8. This, one of the United States, will this year show many new and beautiful features, among which the 47th annual rose show of the Portland Rose Society will be the lead attraction. The whole city will be submerged in roses at that time of year.

Over the period May 15-28 during which the Canadian Railways are offering special fares figuring approximately at one cent a mile for various western routes, the Western Return ticket is thirty days from the date of issue of ticket with the result that the ticket at Port Arthur, Armstrong and points west thereof.

Addressing an audience of more than a thousand representatives of business men at Toronto recently, E. W. Beatty, K.C., L.L.D., chairman of the board of the Canadian Pacific Railway, stated that the Canadian National Railways had been most successful in its experiments in public ownership and that it was neither more nor less than a natural monopoly. This problem, he said, constitutes Canada's most difficult problem and threatens national security.

Starting a tour of Canada which will take him to the principal centres of the Dominion, Lord Baden-Powell, Chief Scout, Lady Baden-Powell, their son, Sir Baden-Powell, and their two daughters, landed at Vancouver from S.S. Princess Charlotte, which had just given rousing welcome in every center throughout the country.

## Social Credit Meeting At Sandy Point

A large attendance packed the school house at Sandy Point Tuesday evening to hear an address on Social Credit. Mr. D. Landry was the speaker of the evening and kept his audience interested and entertained throughout the meeting, which lasted from 7:15 until 11:30 p.m., the audience showing their appreciation by applause at various times. The meeting was concluded by the singing of "God Save The King."

## German Masons

### Dissolve Lodges

Berlin, May 29.—Fourteen lodges of Freemasons "voluntarily declared that the dissolution" yesterday, the Ministry of the Interior announced.

The dissolution was based on a decree announced Jan. 8, 1934, by Gen. Hermann Wilhelm Göring, which created "a simplified process of the dissolution of lodges."

The Nazi system of unity, in the official view, eliminates the need for lodges.

## Alberta's Wheat Acreage is Reduced

The time limit before which wheat could be safely seeded in Alberta passed more than a week ago, with large areas of prospective crop land left unseeded in the north. The Peace River and Northern Alberta had three days of rain last weekend and reported only about 25 p.c. of wheat seeded. The federal members, unfeared defeat, are remaining loyal to Mr. Bennett, and still hoping for peace.

Mr. Bennett's position is one of obvious difficulty. He does not wish to imperil his span of life by carrying on and no one would even hint that he should. At the same time, he does not wish to leave without making the leadership safe, sane, orthodox hands certain to maintain the traditions of the party to which he belongs.

The three prairie provinces estimated the acreage for wheat this year was 22,540,000 compared with 25,296,000 in 1934. The total will not be realized. In fact, the Winnipeg Free Press suggests the acreage will be about 21,000,000 or 22 million acres less than last year. On the prairies, moisture conditions are good and warm weather is needed. - Wheat Pool Budget.

The tenth anniversary of the United Church will be held in commemoration of the event. Everyone is invited to be present.

## Liberals Nominate Dr. Day

Dr. Day, of Consort, was selected as liberal candidate for the federal constituency of Acadia, at a nominating convention held at Hanna on May 20.

## Children's Birthday Party

On Monday, June 3rd, the Krug's birthday, a very pleasant birthday party was held at the Manse in honour of Joey Anderson, age 4 years, and Alan Law, 6 years old.

The little guests present were Miss Betty Pool, Ruth Scott, Jean McNeil, Lois Riley, Irma Davy, Gordon Lach, Jean McNeil, Marion Shirley Stoich and Masters Joey Anderson, Allan Law, Raymond Smith, Gordon Smith, Lloyd Spence, Gordon Howell, Gordon Hopkins, Duane MacRae, Jan Campbell, Allan Rauch, Donald McLeod, Archie Fraser, Freddie Storey, Jack Law.

The young princes were the recipients of many birthday gifts. The party was put on by Mrs. A. J. Law and Mrs. J. N. Anderson and daughter, Louise. The Castle Coombe W.M.S.

The Castle Coombe W.M.S. will meet at the home of Mrs. H. Ferguson on June 12, at 2:30 p.m.

This is our W.M.S. Picnic so bring along your lunch with a cup and spoon. Have a good time with us.

## Canadian Financing

Largest Since 1931

New York, May 29.—During the first five months of this year the Canadian Government financing was the largest during this period in any year since 1931 with provincial and municipal financing aggregating \$206,860,556, according to Wood, Gundy & Co. This company will be \$147,374,292 in 1934 and \$77,705,247 in 1935.

May financing amounted to \$71,491,182, which exceeded that for the like month in any of the past five years, and consisted largely of the Canadian Govt. amount: \$55,000,000. International, maturing in eight and 20 years. The month's total compares with \$58,331,789 in May of last year and \$7,927,919 in May of 1933—Christian Science Monitor.

## Hill To Be Gravelled

It is stated that it has now been decided to gravel surface the hill on the south side of river leading to the ferry. This work will be much appreciated by the travelling public as the hill becomes difficult for carts to negotiate when wet owing to the soil being of a clay nature.

## Tenth Anniversary of the United Church

Sunday, June 9th, being the Tenth Anniversary of the Church Union, special services in the United Church will be held in commemoration of the event. Everyone is invited to be present.

## Bindloss Sports Postponed

The Bindloss Sports Day was postponed yesterday to June 19. Stormy weather prevailing delayed the committee to take this action.

## First Ball Game

The Leader baseball team were visitors to town Monday, to play the locals in a return engagement. The Empress team which was largely composed of junior members, suffered defeat in a one-sided score.

## Hill To Be Gravelled

It is stated that it has now been decided to gravel surface the hill on the south side of river leading to the ferry. This work will be much appreciated by the travelling public as the hill becomes difficult for carts to negotiate when wet owing to the soil being of a clay nature.

## Employ 1000 Men on Highway Work

Work on the new Jasper-Banff highway will be continued when weather conditions permit. It is expected to employ 1,000 men on this work, recruited from unemployed ranks.

## Broom Corn

Arrangements for a larger acreage in broom corn on the Taber irrigation district are being made this spring. Manufacturers in the area are becoming interested. If success attends the crop this year, there is possibility of a small broom plant being established at Taber. The first broom corn crop was put in last year with fair success.

## St. Mary's Anglican Church

Sunday, June 16:  
Evening—11 a.m., Holy Communion,  
Acadia Valley—2.00 p.m.,  
Evensong and Sermon.  
Mayfield—4.30 p.m., Evening  
and Sermon.  
Express—7.30 p.m., Evensong  
and Sermon.

J. S. Parkes  
Vicar.

## Garden Talk

This is the time of the year when the dry land gardener should be thinking about next year and be making the basic preparations. It has been mentioned before in these columns that a dry land garden should be divided into four parts so that each part can be watered, followed every year to conserve moisture for the following year. The gardener at this station stated that for best results the land to be summer-fallowed should be manured with well rotted manure and it should then be ploughed and harrowed. During the rest of the summer the weeds must be kept under control and the land put in good tilth.

The small seeds used in the garden require a well prepared seed bed and such a seed bed is in ideal condition for drilling. To prevent this, it is also to collect sunflowers as a quick and easy source of moisture and if it is not a ready-established plant, it can be made for it at once. A windbreak of trees is most desirable but temporary shelter can be afforded by sunflowers or brush fences.

Many farm gardeners hesitate to grow flowers and perennial flowering plants during these hard times but Mr. Doyle, the gardener at this station, provided the information that perennials such as larkspur, lupines, columbine, Jerusalem Cross, and the golden glow can be grown successfully from seed. He said that this is the proper time of the year for sowing and the best procedure is to sow in temporary frames which can be covered with sacking or cotton cloth to prevent excess evaporation of moisture and baking of the soil. The plants should be left undisturbed until large enough to handle and then be transplanted to spaces three to four inches apart, preferably still in the frames. Transplanting to their permanent locations should take place during late September.

**BROWN LABEL - 65¢ lb.**

**ORANGE PEKOE - 80¢ lb.**

**Planning**

In these days much is heard of the art of planning and the dire necessity for scientific, constructive planning in finance, economics, industry, etc., so that the world may be better prepared to meet the manifold and varied interests and activities. Indeed, if a person was prepared to unthinkingly accept the advice so freely tendered in many quarters, only one course could be followed—namely, to do nothing. What man could it would, definitely plan to order its way, the clear and orderly and authoritative scale and draw a plan that would work with the simplicity and accuracy of the multiplication table.

But the life of man is too many contrary factors enter into the scheme of things and life, too many factors, influences and natural laws which are beyond human control to permit of any such artificial planning that will prove workable and fool proof. As the poet Burns so well expressed it:

The best laid schemes o' mice an' men  
Gang aft agley,  
An' leetle weel's wi' their grit grieve and pain,  
For promised joy.

Two years ago President Roosevelt's "brain trust" decided that the whole economic life of the United States could be planned and charted in advance so that the scientifically planned and directed the production of the great country so as to meet the emergency created by the alleged evils of over-production. It set out to do so, but instead of facing the primary cause of the alleged over-production, it adopted and acted upon a series of measures which were to be the cause of the depression in the volume of production,

So wheat farmers were forced to grow wheat, but to stop growing wheat, paid off in quiet raising hogs, and so on and so forth, and the consuming masses of the people were taxed in order to raise the funds therewith to pay these bondholders, who were the ones who had started in, with a plentiful and full supply of rain, except heavy rains, driving winds and swirling dust storms, and in a brief space of time produced over-production over man's own efforts, and so to a far greater extent, until with a few months a short-sighted farmer, who had been the nation interested in any kind of over-production, had actually resulted from a previous form of artificial planning in the shape of tariffs and import restrictions, in a depression.

During the Great War the statesmen of the world assembled in Paris to draft a treaty of peace and to plan the future of Europe and the world. They labored for months, created elaborate international agreements to the detriment of the peoples, and the world, and the countries, and gave birth to new nations. On paper their plans looked good; they were indeed a great advance in the cause of world peace and international goodwill and co-operation.

But in the end those who have followed all the passions, prejudices, suspicions, racial and religious animosities, and vagaries of human nature have continued to hold away over millions of mankind. Much of the planning has proved to be a failure, and the world is still in a state of confusion, and what remains is in danger of destruction through another world upheaval.

Thus has it been amply demonstrated that man cannot direct and control the intricate forces of Nature, nor can he find them in any sphere of life; the economy he may direct, but he can never control it. He can, however, and where he may be, draft plans and charts which will work despite all the falsehoods, the ambitions, the ignorances, passions and prejudices of man.

This being so, the nations are now being told by the planners that mankind in its present state longer be trusted; that democratic forms of government are not fair, that man's soul is not worth saving, and that governments, forms of government must be set up with strict controls and directed by a few who will super-impose their will upon the masses, control and order the people, instead of the people controlling the government.

Such plans, however, will not work for long, but will last as long as long. It can never possess any degree of permanence, because man was created a free being with a mind, a will, a soul of his own, and in the final analysis, he is the master of his fate, and he will not submit to be controlled, work out his own salvation. No other power, and least of all government, can do it for him.

Nevertheless, there must be planning and there must be direction.

Everything cannot be left haphazard, otherwise chaos and disorder would ensue. But it must be recognized that there are limitations in all planning, and those imposed by Nature's laws and by human frailties cannot be removed.

Now, if man is to be a free man and enjoy liberty he must, any attempt to do so will breed revolt. It always has; it always will. But liberty does not mean that each man must do as he pleases, but that each man must recognize the rights of others and accord liberty to others.

Therefore, in all our planning the improvement and advancement of the individual must be considered, of all abilities. In any system that must prevail, it is putting the cart before the horse to start with the system first and thereby improve man; it must be the other way round. God does not remove all evil and temptation in the world, but we are taught to do so.

The proper study of mankind is man, and the proper, only permanent, plan is to improve his ambitions and his passions, as to come within the plan laid down in the Golden Rule—Do unto others as ye would that they should do unto you.

**Helps Building Industry**

**Chemistry Comes To Aid With Many New Materials**

Even eggs and milk may enter the making of new construction materials in a building boom predicted by famous chemists at the opening session of the American Chemical Society's centenary celebration in New York.

A book in the building industry inspired by discoveries of chemists, many of them made during the depression, was forecast by Prof. James P. Wetherow of Ohio State University.

Artificial stones are already made in every color and with any degree of hardness a contractor desires. Wood, rock and stone are both saved by numerous new protective.

Bricks that parake of the lightness of thistledown and other light weight construction materials promise much higher, yet even safer sky-scrapers.

**Queen Mary's Tea Chest**

**Gift From Ceylon To Be Exhibited In Toronto**

Visitors to the Ceylon exhibit at the forthcoming Canadian National Exhibition in Toronto will have an opportunity to see the beautiful gift presented to H.M. Queen Mary at Christmas by the Empire Tea Growers. The chest is made of rare and lovely woods—rosewood from India, inlaid with satinwood and ebony from Ceylon and purpleheart from British Guiana. It was made by skilled native craftsman at the express wish of Her Majesty. The inlay on the lid has the Queen's own royal cypher. When presented to Queen Mary the chest contained fifteen pounds of the finest grown tea, valued at over \$3 per pound.

**NOT A RHEUMATIC PAIN FOR 4 YEARS****70-Year-Old Man Praises Kruschen**

A man who once suffered severely from rheumatism writes:

"For a long time I suffered with rheumatism and had to give up my work nearly 20 years ago and have continued to use Kruschen ever since. Kruschen did the trick, as I have not had a rheumatic attack over the past 20 years of age, and feeling fine, and always able for my day's work—thanks to Kruschen."

Kruschen dissolves away those needlessly crystallized acids which are the cause of rheumatic troubles. It will also flush dissolved crystals clean out of the body. You keep up "the little daily dose," excess uric acid will never form again.

**Of Canadian Make****Dominion Supplies Medium-Quality Gauntlet for English Motorists**

Motorist and motor cyclists in the United Kingdom wear leather gauntlets, and driving gloves, and so on. Even during the summer months motor cyclists use them at night. A large proportion of the medium-quality motor cyclists' gauntlets are of Canadian make, according to the manager of the Canadian National Railways.

While the British are experts when it comes to sheepskin gloves, strange as it may seem, in the case of those made of heavier leathers, such as cow, mule and horse hide, they have to be imported.

**A Dangerous Procedure****Doctor Warns Against Forced Giving Of Cod Liver Oil**

Dr. Irving Grant, a pathologist of Brooklyn Hospital, New York, told the American Association of Pathologists and Bacteriologists; mineral oils and animal fats draw into the lungs of infants and adults had passed fatal doses of pneumonia. Cod liver oil, described as good when taken into the stomach for bone building, Dr. Grant said was deadly when it entered the lungs. He cited one case to show the oil had entered the lungs through forcing a reluctant child to swallow it by holding his nose.

**Umbrella Works Idle**

Because one cannot carry an umbrella while wearing a uniform and maintains one's dignity, the man who has to go out on patrol in Germany. As a result 150,000 people in the umbrella industry have been thrown out of work and manufacturers are seeking ways and means to bring the umbrella into its own again.

**Another Surgical Find**

**Human Suffering Reduced By Operation On The Nerves**

Surgery on the nerves of pain offers hope of reducing human suffering.

The operations possible were reviewed by Dr. Francis C. Grant, M.D., of Philadelphia, a member of the American College of Physicians.

Some of the fibres form the bundles of nerves, just as separate fibres form threads, carrying the sensations of pain; others give the movement orders.

Surgeons cutting the pain fibres in the spinal cord can be stopped in the legs and up into the pelvis. Touch and position nerve fibres remain unimpaired and the movements of the legs are not affected.

Another operation severs the roots of some of the nerves, but is seldom used because, while it relieves pain, it interferes with movement.

Surgeons are blocking the "pain pathways" through nerve systems.

It is the latest method of attack.

This has been done successfully for some pelvic malignancies and for angina pectoris.

**Powerful Searchlight**

**Throes Begin Which Will Illuminate Objects Within Fifty Miles**

Residents of Pittsburgh city gazed in wonderment at a powerful shaft of light that penetrated the darkness for many miles. It originated with what engineers say probably the world's most powerful searchlight, built underground at best prior to its delivery to the United States Army.

The searchlight is a 60-inch giant and throws a beam of 750,000 candle power, which at 50 miles distance the light's concentrated, narrow beam will illuminate any object within 50 miles.

The "detecting" equipment is entirely mobile, carried aboard a truck.

At a speed of 100-foot wing spread flying 20,000 feet high and six miles away appears to the human eye about as big as a wasp.

To find an enemy bombing plane under such conditions is something like finding a needle in a haystack.

The searchlight is designed to do it, and expose the plane to the fire of anti-aircraft artillery.

**Holding The British**

**New York Fans Stick To State Standard—With Pleasure**

The New York Daily News says: "We've received a number of undulating letters in reply to our editorial in which we said England is right in refusing to pay any more of its war debts to us for the war. These letters assure us that we are in the page of the Redcoat traitor to Uncle Sam, trying to tickle the King's boots, etc."

Let's come down to brass tacks. How about our debts to our own people? Are we going to pay them off or not? We're paying them, are we?

President Roosevelt has taken 40 cents out of every dollar, and we are paying him back.

Our Super Powers are not in that defile. So if John Bull is a nasty old repudiate, what is Uncle Sam?

That's the war cost so much that every country which took part in it, including ourselves, has had to repudiate a large part of its war debts.

The fact is the war cost so much

that every country which took part in it, including ourselves, has had to repudiate a large part of its war debts.

Cancels For Russian Farms

Farmers of Soviet Russia are to be supplied 257 tanks this year to be used in the campaign against the German camel farms. The farm in the semi-arid Zedich district of Western Kazakhstan now has 2,335 ships of the desert, the herd increasing 24 per cent. in 1934.

If on rising in the morning you stand in your pyjamas before the open window and slap your chest several times, you will notice after a few minutes you will notice a crowd slowly gathering in the street below.

Clubs for railroad workers are being organized in Russia.

**A SIGHT BETTER!**

**LARGE PLUG**

**20¢**

**DIXIE**

**PLUG SMOKING TOBACCO**

Fresh from start to finish  
Costs so little, too;  
Cut it as you like it,  
It's Dixie Plug for you!

**How Spare Pennies Grow**

**British Post Office Savings Increased By \$28,000,000 Last Year**

More pennies and shillings than ever before were turned in to Post Office Savings Banks in Britain.

The head office has announced that deposits of small savers have reached the record figure of £355,000,000. They increased by £28,000,000 during last year alone. Over the last two years they have increased by £50,000,000.

These large sums are made up entirely of the occasional spare coins of village and townsmen in Britain, the owners of the savings banks and the postmen who collect the money and stick them in a savings book. When a certain number have been collected the book is given to the local post office and the amount represented is credited to the account of the post office.

Last year 250,000 "house safe" posts were issued. These are special post office home money boxes which can be taken to the local post office when the owner sends along the amount in trust to his bank.

The Post Office Savings Bank now has more than 9,500,000 depositors. And that number is increasing by 12 cent. each year.

**Are Becoming Important**

**Aviation Is Creating Interest In Islands Of Ocean**

Soon every little island in the ocean is going to find itself important and valuable, and will be developing as it is, places which in the past have not even been spots on the map will become centres of interest. Here, for instance, is the case of the Wake Islands, away out in the Pacific Ocean. They are little islands, with a total area of less than 2,600 acres, yet they are to be a point of call on the proposed U.S.-China air route, plans for which are now well under way with Pan-American Airways and the United States Government co-operating.

As far as Canada is concerned

Aviation is creating interest in islands of ocean.

Colporteurs Deliver An Average Of 30,000 Bibles A Month

By dog team in the far north and on the prairies, and by boat in Canada, colporteurs distribute an average of 30,000 Bibles a month, according to the annual report of the Canadian branch of the British and Foreign Bible Society.

An English company founded for Bibles in English is reported from foreign language groups of workers in Western Canada.

After all expenses were met, \$39,000 was sent to London for worldwide distribution with \$23,000 in 1933. Bibles distributed showed an increase of 22,000.

Calling Up Conscripts

General Hermann Goering, Minister of Aviation, told foreign correspondents that Germany's first class of conscripts since compulsory military service was abolished by the Versailles Treaty

would be called to the colors Oct. 1 for one year's service.

**A Suggested Title**

**"Lord Greenmantle" Might Be Suitable For Mr. John Buchan**

Lord Edward's "Greenmantle" is at present being hailed in London papers as the first Commeur to be Governor-General of Canada. They will find, before Mr. John Buchan takes over, he has been made a peer.

It would be a cheerful literary suggestion to call him "Lord Greenmantle" for that is also the title of one of his most popular books. He is well able to support a peerage though only a son of the Scottish name, because he must be a man of mark, and he is, as shown by his versatile pen. He wrote his first book when he was only eighteen. Even his life of Cromwell sold over twenty-five thousand copies, which cannot have brought the author less in royalties than \$60,000. Several of other books have been best sellers.

He was at sea on a naval ship during the War when, after reading a popular "thriller," he decided to try his own hand at that kind of thing. The "Redhead Miss of 'The Thirty-Nine Steps'" was complete—London cor. Ottawa: J. Dunn

# Outburst Of Loyalty Greets Their Majesties Driving Through London

London.—An overwhelming spontaneous outburst of loyalty greeted Their Majesties Sunday when they took another unscheduled drive through the east end of London to see the jubilee decorations. The Princess Elizabeth, daughter of the Duke and Duchess of York, accompanied them.

So secret were the royal plans that even police were taken unawares by the arrangement. On several occasions the royal car was stopped by traffic lights.

Their Majesties received a particularly enthusiastic reception in Chiswick and the dockland, where crowds of so many men and women almost brought to a standstill. Men, women and children, cheering wildly, surged about it, some of them jumping on the running-boards.

The week's celebrations closed Saturday evening with a grand review of the king and queen on the balcony of Buckingham palace shortly before midnight. A dense crowd estimated at 250,000 packed outside the palace. So great was the crush that 12 persons were taken to hospital and more than 500 treated at first aid stations. Many were knocked down and others fainted.

Discussing the festivities of the week, J. L. Garryn, editor of the *Observer*, who was present, said it was a mighty, inspiring review of what is meant to-day by the monarchy, the nation and the empire in their political trinity. If the world was thrilled, as we are told, it was because we ourselves were touched to the heart. If the world was astounded, it was because we were astonished ourselves.

Wales, Scotland and Northern Ireland joined with England in special honor to the king as three princes of the royal house represented His Majesty at Cardiff, Edinburgh and Belfast.

Cardiff is accustomed to receiving visitors by the hundred thousand for international soccer games, but never before receive so many as when the Prince of Wales represented there.

Not less enthusiastic was the reception accorded the Duke and Duchess of York at Edinburgh.

Before gave a royal welcome to the Earl of Ulster, otherwise the Duke of Gloucester.

## Missionaries In Danger

**Forced To Abandon Station In China On Account Of Communists**

Toronto.—Letters received by the foreign mission board of the United Church of Canada said that the members of the church, mostly from Szechuan province, western China, were forced to evacuate their stations because of advancing Communist forces. Capture of Chengtu, the provincial capital, was imminent, the officials said.

Rev. Gerold S. Bell, of Toronto, wrote that some Canadian missionaries, due home this year on furlough, left a few weeks ahead of schedule.

## To Test Parachute Plane

Los Angeles.—Col. Roscoe Turner, speedster, said he is awaiting completion of a 90-foot parasite large enough to lower a passenger plane safely to earth in case of an emergency test in mid-air. "I hope to take it aloft within 60 days," he said.

## Two Noted Canadian Aviators May Join Antarctic Expedition

New York.—Reports that two noted aviators of Canada, H. Hollieken-Kenyon and J. H. Lymburner, would join the Wilkins-Ellsworth Antarctic expedition scheduled to leave here in October were heard here.

Hollieken-Kenyon, of Winnipeg, was director of the Canadian airways. Lymburner, another flyer who has carved a name for himself by exploits along the oft-frozen airways of Canada, was reported en route to the city.

A projected non-stop flight of 2,900 miles across Antarctica is a start of the plan of the expedition headed by Sir Hubert Wilkins and Lincoln Ellsworth.

## Life History Of Quintuplets

**Dr. Dafee Will Speak At Meeting Of American Medical Association**

Atlantic City, N.J.—Dr. Allyn Roy Dafee, the court physician who took New York by storm after bringing the famous Dionne quintuplets from Ontario, Ont., into the world, will chair the luncheon charges of the annual session of the American Medical Association and the Canadian Medical Association.

The meeting, June 10 to 14, will be one of the largest ever held and will be the final meeting of the American and Canadian associations ever jointed for their annual sessions. It is expected about 8,000 physicians from the United States and at least 2,000 from Canada will attend.

## Plan To Connect Vancouver And Alaska With International Highway Down Pacific Coast

"Build the Alaska highway and put Vancouver on the great international highway that reaches down the entire western fringe of the North American continent."

That is the international missile on which A. F. Holloway of Seattle is engaged. He has in mind the vast resources of Alaska and the Yukon, and on the return route of Central British Columbia, securing public backing to petition to be sent to the Dominion and provincial governments in Canada, and to the United States Congress.

Here are the main facts of the highway to date:

Pacific Yukon highway now built to Hazelton from Vancouver, distance 825 miles.

Canadian portion to be built to Alaska boundary, 865 miles.

Cost of Canadian portion, twelve million dollars.

United States portion to be built in Alaska, to Fairbanks, 371 miles.

Cost of United States portion, two million dollars.

This project would establish one of the world's greatest scenic tourist routes.

It would take tourists from Vancouver up through the great Fraser Canyon, thence north to the Columbia highway, then west along the main road from Vancouver to Hazelton, thence into the Yukon, with a connecting road from Prince Rupert connecting road at Hazelton.

The entire Pacific coast has got in behind it, and the Yukon highway, chambers of commerce, service clubs and various organizations have gone on record in favor of it.

He is confident that the railway would be one of the greatest tourist revenue producers, as it does encouragement to mining, timber, furs and big game.

"Do the citizens of Vancouver realize the importance of having such a highway completed?" Mr. Holloway wonders. "Do they realize the great benefit that it accords not only to Vancouver but to British Columbia and Yukon Territory? It will be a golden highway leading to the midnight sun."

"It will," he adds, "give opportunity to thousands and will open up a vast territory of mineral possibilities, an enormous field for profitable investment, and an inviting region for prospectors and homesteaders, as well as an area of magnificent scenic beauty."

"There are areas that must attract untold thousands of tourists and which will be a golden harvest."

In addition to these things, Mr. Holloway believes the Alaska highway will connect the friendly relations between Alaska and Canada and their British Columbia neighbors.

A pioneer of Seattle, Dawson and Fairbanks, Alaska, Mr. Holloway is the author and publisher of a valuable map of Northern British Columbia, Yukon, Alaska and Siberia, which bears the slogan "Open the Golden Empire of the North." It shows the proposed route of the highway, Vancouver to Fairbanks.

### Sympathy Being Wasted

**Modern Youth Need Not pity Women Of Victorian Age**

Young people to-day tend to waste too much sympathy on the Victorian woman, in the opinion of Mrs. A. R. McBain. They pictured her, she said, in an address to the Montreal Women's Club, as "a distinguished, shut-in by three thicknesses of curtain and a heavy father."

Beginning with Queen Victoria herself, whom some biographers represent as being a "poor, lonely, unhappy woman," Mrs. McBain pointed out a number of women who had made notable achievements. Among them were Florence Nightingale, George Eliot, Charlotte Bronte, Elizabeth Barrett Browning, Fanny Burney.

"I think one of the things we cherish have come to us from the despised Victorians," said Mrs. McBain.

A college professor has drawn up a list of 10,000 words necessary to an understanding of what is going on in the world to-day. For business men the word "nothing" seems to take care of the situation pretty well.

The production of processed cheese in Canada in 1934 amounted to 11,996,548 pounds, an increase over the preceding year of 1,361,324 pounds, or 13 per cent.

### Melodious Auto Horns

**Research Proves They Have Great Carrying Capacity**

Another cause of motor strain, the raucous modern horn, is an equally needless affliction. Here again research has proved that a double-note tuned to a major or minor third gives great carrying capacity with minimum strain to the ear, and its use might well be popularized. The general noise of traffic is hard to reduce, but it is by the glaring offenders that the nerves are jarred, and the worse of these can and should be eliminated.—Manches- ter Guardian.

### SPECIAL OFFER 10c.

#### SPRING FASHION BOOK

For the latest Fashion Book (regular price \$1.00) send 50¢ at when ordered with a pattern.

—See Mail Address Below—

**SUMMER COTTON BLOUSES: PATTERN PROVIDED FOR BOTH STYLES**

By Mrs. Sterk

The softest draped neck blouse is very dainty looking in eyelet batiste and so exceedingly wearable.

The V-neck blouse with bow finishing at the waist is a very daintily print smart for linen sports suits or to wear with a separate peasant collar.

Loads of other cutouts as falsetto, plique, chiffon sweater in stripes or dots, etc., are also available for these simple to make blouses.

Style No. 84 is designed for sizes 14, 16, 18, 20, 22, 24, 26, 28, 30 and 40 inches. To send 20¢ for 2½ yards of 36-inch material for View A. 1½ yards of 36-inch material for View B.

The Spring Fashion Magazine is better than ever. Entirely illustrated in a very stimulating fashion edition. These clothes are for crusing and clothes to brighten the lives of stay-at-home mothers. Add me to your mailing list for the smaller members of the family. Of course, patterns are obtainable for all sizes. Send 25¢ for pattern and your copy to-day, the price is 20 cents.

During the fiscal year ended March 31, 1933, 198,916 boxes, or about 13,624,120 pounds, of Canadian dressed poultry were imported for export and local and interprovincial shipment under the supervision of the Livestock Marketing Board and the Department of Agriculture. This was an increase in shipments over the 1933-34 fiscal year of 73,331 boxes, or about 5,133,170 pounds.

Father: "When I was your age, my boy, I didn't have as much money in a month as you spend in an evening."

Son: "Well, it's no good grouching at me, dad. Take it out on grand-father."

"I don't know what you're grumbling about. I've told you I'll carry the grub bag after lunch."

—Travis, Rome

### Checked By Master Clock

Standard Time Zones govern Railroad Roads in Canada

A Canadian, Sir Sandford Fleming, introduced "standard" time which became effective among the nations of the world in November 1883, states F. B. Sayre in an article in the April number of Canadian National Magazine. As a result standard time governs all of the railroads of Canada and the time of all railway trains in Canada and trainmen's watches are carefully checked at stated periods by a master clock which is governed automatically. Time signals are sent out every five minutes to each station by all points on the Canadian National System. The article mentions a new time recorder installed by one of the Canadian National watch inspectors who have a remarkable ability to determine the exact time of a watch in one minute's operation that could formerly be obtained by a twenty-four hour check.

### Fast Locomotive Ready

Newest Steam Engine Can Travel 120 Miles An Hour

A 120-mile-an-hour locomotive, the answer of the steam engine builders to Diesel competition, tore through a red, white and blue vest at a locomotive works in Schenectady, N.Y., and was put into service for service to a middle western railroad.

The engine is the first of two to run between Chicago and St. Paul. The Hiawatha, for that is her name, is an oil burning steam engine covered by a smooth metal shell.

### Why Mining Is Precarious

Once Ore Is Out Nothing Can Replace It

Once an ounce of gold, silver, copper or any precious metal is taken out of a mine, it is lost, reminds Hon. W. A. Gordon, Minister of Mines. And just because of that simple fact, the business of mining is rather precarious.

He has been in Hattiebury for 30 years, and knows what he's talking about. He has built mining camps start and boom and many of them fade out.

As Mr. Gordon points out, having nothing to replace it, nothing can be done to replace it. There is just a hole in the ground.

If wheat is sown on a farm, more wheat is harvested. But more precious metals cannot be replaced so easily as long as the vein of ore. In some cases the depots are ready and can be worked for years and years. In other instances, the veins run well for a time and then give out suddenly. When the ore is finished, the mine is through.

Once a mining town has gone there is little that can be done about it. The government is powerless to revive it, because usually a mining town is located in a remote part of the country, the necessities of agriculture development and its location is as a rule too remote to become important industrially.

The modern girl certainly has a hard time trying to please everybody. When she isn't being criticized about the clothes she wears, someone complains about the clothes she doesn't wear.

## Air Powers Are Striving To Develop Mammoth Airplanes To Transport Troops At High Speeds

### Celebrating In Big Way

Britain's Great Sales Catchword This Year Is "Jubilee"

Britain is jubilant crazy. It's the chief point of interest for every true-blue Briton, and the reason is the year's great sales catchword.

If a girl wears her king and empire skirt she'll wear a red, white and blue ensemble. She will have her finger rings in red, white and blue striped stockings, red, white and blue striped earrings will be in her ears, and a scarf to match will be around her throat.

She will have the colors of the Union Jack in her clothes, arranged in various ways. Perhaps she will have a white skirt, red blouse and blue coat.

Her head will be covered with jubilee curls, her frock will clip with a miniature of the king and queen, and special jubilee beauty marks will give her a "jubilee face." Those girls with blue eyes, red cheeks and white skin will be just in style.

Jubilee cocktails are the favored drink; a cocktail which hasn't at least one "gold" shot in it won't do. In fact, the jubilee hop and the jubilee blues are features of some night clubs and dance halls.

The jubilee has brought great joy to the retailers, wholesalers and manufacturers.

Flares or stores display a vast mélange of merchandise arranged in a patriotic manner, with emblems of the empire made out of all sorts of things, even lingerie.

Even spring flowers in the parks and in the jubilee gardens have their part in the jubilee movement. Red, white and blue blooms grow in special beds.

### King Of Wheat Kings

Seager Wheeler, Wheat Grower Extraordinary, To Take A Trip

To America

In recognition of his contributions to agriculture in Western Canada, Seager Wheeler, wheat grower extraordinary of Rothesay, Saskatchewa, has received a gift trip to England through a number of his friends and the Canadian Pacific Railway.

Famous throughout the world for the championship wheat that has grown, the story of Seager Wheeler's life is one of a man who has been resourceful and pluck, yet unaccompanied by disappointment and temporary failure, and finally reward with a large measure of success.

Emigrating to Canada from the Isle of Wight in 1885, when but a boy, he soon became a successful wheat producer, introducing new and better strains of wheat adapted to Western Canada conditions which made him one of the Dominion's outstanding settlers. He is the only man who had the distinction of being invited to speak before the Royal Society of Agricultural Engineers, having won the title of champion-wheat in 1911, 1914, 1915, 1916 and 1918. In addition to wheat awards Seager Wheeler has captured many prizes for can and barley, and has also won awards for the cultivation of various grasses, fodder crops, potato etc. In honour of his accomplishments a doctorate was conferred on him by Queen's University.

### Television Tests

Sight By Radio Now Being Developed

In U.S.

Field tests of "real" television, looking to the day when sight by radio may be as common as sound, are to be started in the United States as soon as an apparatus can be put into operation.

Construction work is to begin immediately, David Sarnoff, president of the Radio Corporation of America, told the annual stockholders meeting, with the expectation that all the equipment will be ready in 12 to 15 months.

Sarnoff stressed that the tests did not mean a "regular service of television is here or around the corner." He added that while "sound broadcast television" fundamental to radio communication to the home, television is "promised as a step by step development that would supplement, not supplant, existing radio service."

In the northern hemisphere cyclones whirl clockwise, counter-clockwise, while in the southern hemisphere they whirl clockwise.

The "Aircraft Year Book," issued by the Aeronautical Chamber of Commerce of America, says that "multi-engined machines carrying 500 passengers with full fighting equipment, the equivalent in bombs," is what air forces are aiming to develop within the next few years.

Such mammoth machines, the year book says, would be capable of 300-miles-an-hour speed at an altitude of 20,000 feet.

Of Germany and her air force, the publication says:

"Within the space of two years of the most intensive effort, Germany, with 17 aeroplane factories and nine aircraft plants, has succeeded in turning out 600 combat planes. With the exception of several experimental types, including three light bombardment and one heavy bomber, none of the German planes has been developed to a state of speed and performance which would warrant employment in war, except the French and Polish equipment."

France has more combat planes than any other power, according to the publication. It goes on to say: "France has approximately 3,200 fighters, bombers and observation machines on duty abroad, and 260 are maintained by other air forces in the dominions and other possessions of the empire."

### Wheat Quality Conditions

Excellent Quality Of Western Wheat Due To Seasonal Conditions

Quality in wheat is largely determined by the character and quantity of the protein. Protein in wheat is commonly known as gluten. The quality of wheat is often said to be chiefly an inherited factor but investigations by the Dominion Department of Agriculture extending over a period of thirty years have shown that the amount of this valuable protein in wheat is mainly dependent on the local conditions principally precipitation but also temperature and hours of sunshine. These investigations have been conducted at a considerable number of stations located in different regions of the country. The Dominion and the state agricultural surveys clearly prove that the excellent quality of the wheat of the Prairie Provinces in general is largely due to favourable seasonal conditions which include high temperatures and abundant rainfall.

These latter factors are little signs of the development of the grain. For the production of the high quality wheat, the economic value of these conditions says the progress report for 1930-32 of the Dominion Division of Chemistry, has been estimated at \$100,000,000 to \$150,000,000 to be of almost equal importance to that of desirable inherited characteristics such as quality of gluten and earliness in ripening, and a fertile soil.

Stories Are All Wrong

Professor Says West Indies Voodooism Is Peaceful Religion

Stories of bloody voodoo rites in the West Indies have been "debunked" by Dr. Melville J. Herskovitz, who recently returned from a three-months' sojourn in native parts of the most primitive peoples in Haiti and western Africa.

Dr. Herskovitz, professor of anthropology at Northwestern University, Chicago, has engaged for 10 years in the study of primitive peoples.

"Voodoo is not the bloody terror that movies and books make of it," he said. "In reality it is a most peaceful religion. Its devotees attend ceremonies regularly on Saturday night, much in the nature of Wednesday prayer meeting. Human sacrifice is unknown."

Efforts Predicted

Paris, France, offers the month's "biggest" news item: An old man and his wife were captured by a band of francs during the war in sending comforts to friendless French soldiers they had "adopted" have now in their turn, when they are penniless, been "adopted" by the survivors.

Christian Buch was regarded by Humboldt as the greatest geologist of his age.

## The SNAPSHOT GUILD

Don't Overlook the Importance Of Birthday Pictures

Don't delay taking the new baby's picture and then watch him grow through monthly snapshots thereafter.

In these modern times the father, if he is permitted to, sees his newborn babe for several days after Sir Sterk has delivered his precious glass of a wizened wind-up camera.

Nurses and doctors decide he is not a complete baby yet, so he is not to attack the baby and retard its growth, he should by all means exercise his permission to "shoot" the baby with a camera, of course.

Even months later he still considers the baby life until he is a real older. Then regular yearly birthdays are in order. At least a few snapshots should be taken of the new boorder and after the first twelve months he had better keep his camera handy to take pictures of him never to tell when your baby is going to take his first steps, first words, first teeth, first event in his life—not his.

It apparently means nothing to the baby. He is born in a little nest, but careful nursing and love get all excited, let out a couple of whines, gape, laugh and scare the infant so much that he is not even aware of what is going on all over again.

The chances are that you will not be able to get a picture of the baby when he is born, but hold the camera in your hand you may, in your excitement, even turn it in the wrong direction and get an out-of-focus picture of your own midsize.

Father: "When I was your age, my boy, I didn't have as much money in a month as you spend in an evening."

Son: "Well, it's no good grouching at me, dad. Take it out on grand-father."

### CHAPTER I.

Dad was worried about something. All through dinner Nancy had been aware of it. Not once had he taken part in the conversation, and though outwardly unchanged (the girl was proud of her well-groomed, youthful-looking father), she seemed, somehow, a little miffed. When ever Jack's spirited account of Everett's victory at the game that afternoon quite failed to rouse him, both aunts glanced up, puzzled, and Nancy said: "Let's have a fee in the living room, just to have husband and touched his shoulder.

"What's wrong, Jim? Has something happened?"

Dad turned quickly, as if started at the question.

"Something's wrong," he admitted, pulling himself together with what seemed to all of them a tremendous effort, "and since the little boy's away, it's a good time to tell you. Don't bother with coffee tonight, Margaret. Come into the other room and close the door. I—1—I must get it over."

But after all, James Nelson did not have to break the news. It was his sister, always quick to grasp a situation, who asked as they gathered in the living room: "Did that crash in the market-to-day wake up your husband?"

Her brother nodded—wet his lips. "I—am down and out, Louise; he has no job, but Nancy says that was looking at me with a smile. And Mother was looking at him, strangely. She seemed, thought the girl, stunned for just a moment."

"Down and out," James Nelson repeated grimly, still staring at his wife with eyes that had grown dimmer. "And I'm not alone. But Nancy says that was looking at me with a smile. And Mother was looking at him, strangely. She seemed, thought the girl, stunned for just a moment."

"I'm not alone," she admitted, pulling herself together with what seemed to all of them a tremendous effort, "and since the little boy's away, it's a good time to tell you. Don't bother with coffee tonight, Margaret. Come into the other room and close the door. I—1—I must get it over."

"Well," continued Mother, coming suddenly into life, "why not?" She sat down on the davenport beside Dad, and put an arm across his shoulders. "Tell us, dear, just how bad everything is."

He drew a relieved breath, as if the worst were over.

"Well, as bad as it might be, perhaps. I can't go into details now; but at least, I'm not in debt to others. That's the thought I held onto when I looked at the crowd of desperate men in the stock exchange this afternoon—a terrible scene."

## WEAK WOMEN

Are you tired, nervous, run-down, listless? No ambition? Take Lydia E. Keen's Marvelous Curable Compound. It quiets nerves—improves the appetite—makes life seem worth living.

Mrs. James Martin of 22725 Main Street, Los Angeles, California, says: "Your Vegetable Compound built me up wonderfully. I have more energy, I feel better and I have a good appetite. I feel much stronger."

VEGETABLE COMPOUND

Get tin of 12 tablets or  
economical bottle of 24 of  
100 and a fragrance.

Their faces—well, I wish I could forget them. I went back to the office and just sat there thinking—trying to see my way. I'm fifty-six. It's not easy to start again at that age, Margaret. This house is yours; but we can't afford to live here. What house we buy will depend on what part will fall on you—all of you, I mean. The servants, too; they'll have to go. And—And Nancy was to have had her debut soon!"

"Oh, forget it! The girl spoke impatiently, but could not have spoken otherwise without crying.

"For my part," observed Jack, "I should think Siris would be relieved to get rid of all that fuss. I'll get a job, Dad. I never was keen on college anyway. I was only going so long to please you. And I won't need Mom. I am going to work. She'll bring in—something."

"Mary Ann" was the boy's beloved rooster. James Nelson's eyes brightened suspiciously as he said: "You're a real kid, both of you. I feel as though I'm selling you this blow with so much gusto. I know I could count on Mother; and Phil's too young to hunt the fowl. As for you two," (turning to his own sister and his wife's), "you're safe, thank heaven. This was my first grand of comfort—just like you. You money into good, dependable bonds."

"For mucky's sake!" broke in Aunt Louise. "Why didn't you tell us sooner? If Judy's savings and mine are still intact, things aren't so bad. Even with that small capital you can start again, Jim."

"If you think I'd touch a penny—" he began, when Aunt Judy interrup-

tuted:

"Why shouldn't you? What would I have now, Jim, if you hadn't managed my affairs so carefully all these years? You're a real kid, both of you."

She said: "Margaret, of course he'll take our money if it will help."

Said Mother: "Perhaps he won't need to if we sell the house."

Jack said: "I'm not so sure. Dad told her, "but I have no doubt we can rent it at a good price. And if we move to a small apartment, or even into the suburbs for a while, as to cut all possible expense, it will give a chance to look around."

"See how you've got us?" said Judy as if referring to the fact that Elizabeth is vacant now. Why not go and have there and have no rent to pay?"

Judith had inherited the family home from her father's death some fifteen years ago. The house was more than twenty miles from town, and as no one spoke for just a moment, she questioned: "Could you stand commuting, Louise? It would mean a pretty early start for you."

She colored, as if guilty of some

already paid, may as well finish, I suppose."

"Who?" They give the money back, Dad?" questioned the girl.

James Nelson glanced at his sister, the inner workings of a private school being more in her line than his; and she responded: "In a case like this I believe they'd refund most of the amount if Jack wants to finish out the year till I'll finance his expenses."

"And relinquish that European trip next summer?" countered her brother.

She colored, as if guilty of some

"It's a relief," she said. "I don't know they exist anymore."

"They do," smiled her aunt. "You see one before you now, my dear, understand, daughter; but we mustn't let him see our disappointment."

"Chaperon!" burst from Nancy. "It's such a shame to disappoint him. Jim's a work of art."

"It's a relief," she said. "I don't know they exist anymore."

"They do," smiled her aunt. "You see one before you now, my dear, understand, daughter; but we mustn't let him see our disappointment."

Thursday, June 6th, 1935

Telephone lines west were broken down in Tuesday's storm.

St. Mary's W.A. will meet at the home of Mrs. Ferguson, on June 18.

The announcement has been made over the radio that the date or the federal election will be Monday, August 19.

Billy Leah, who underwent a major operation this week, is reported to be making favorable progress.

Summer is here, but cool weather has had its effect on the popularity of the old swim, hole.

A meeting of director-delegates of Social Credit for the Empress Constituency, took place in town, Wednesday afternoon.

Miss Betty Flett is home for a month's vacation with her parents at the Jacobson ranch. She is a member of the nursing staff of the Melfort hospital and states they are putting up a new hospital at that point.

Miss E. Rauch, nurse, was in town Saturday with a patient for medical attention from Leader.

The annual C.P.R. contract of loading cars with engine and commenced at this point, this week.

K. A. Pollock, Liberal candidate for the constituency of Empress, was a visitor in town over Thursday night.

Miss Kate Oredol, left on Saturday morning for Brooks, Alberta, where she has accepted a position.

Cold northwest winds have characterized the weather for several days this week.

Dr. Dowler left this week on a visit to the home of his parents at Vernon, Alta., and will return to the Calgary, where he will resume dental clinic meetings.

Itch

Of all the parasites which seem to exist solely for the annoyance of mankind, none is more widespread than the one known as "itch mite," which is responsible for that common affliction, called "the itch," or scabies, which is familiar to both sexes and all ages.

The itch-mite can be seen without the aid of the microscope; it is round and whitish, with four pairs of legs. The trouble arises from the fertilized female burrowing into the skin. She cannot turn around in the burrow, so must continue to go ahead, laying an egg or two a day until she dies.

These eggs are hatched, and the adult is developed in about two weeks, the female being large and the male small.

The disease is spread by contact with the infected person or with his clothing and bed-clothing. It is most common where more than one individual uses the same bed-clothing, under conditions of over crowding and low standards of personal cleanliness.

The burrowing of the female itch-mite sets up the skin irritation which causes the itch. The itch-mite prefers thin, folded and moist skin. The disease commonly begins on the front of the wrists and elbows and between the fingers, but it may spread all over the body. The itch is experienced chiefly at night. At this time, in the warmth of the bed-clothes, the itch-mite becomes active and does most of her burrowing. Once the condition is recognized, it can be corrected by the

proper use of such an itch-mite poison as sulphur. The first treatment is a hot bath, with the free use of soap and a soft nail brush. This exposes the tunnels or burrows, so that the sulphur which is later applied may destroy the itch-parasite.

Sulphur, prepared as an ointment, is applied night and morning for two or more days, being rubbed thoroughly into the parts most infested. At the end of that time, but not before, another hot bath is taken and the underwear is changed. The clothing and bed-clothing must be sterilized. If dried and blanched beans are baked, the whole household must be dressed in them, so the parasites will soon disappear to those who have been freed from them who were not treated.

Itch is not a dangerous disease, but it is responsible for a great deal of discomfort. As a result of the itching sleep is lost. Scratching very often breaks the skin, with the result that infections, such as boils, sometimes develop.

Itch will seldom, if ever, occur among those who keep their bodies clean by regular bathing and keep their own toilet articles for themselves. However, anyone may be exposed to and contract scabies, and so it may be introduced into the family.

If this happens, it should be attacked by proper methods, until the whole family has been entirely freed from it.

Garden Talk---cont.

Tomatoes, egg plants and peppers are tender, hot season plants and do not usually benefit by being planted much earlier than the first week in June as they are susceptible to damage by even the lightest frost.

Furthermore, they will make no real growth as long as the weather and soil are cool. Small plantings can be made slightly earlier and protected by covering the individual plants at night, but this is not practical for large plantings.

Tomatoes are planted out at this station during the first week in June and the side shoots are pinched off at the time of planting as only one main stem is desired. Mr. Coyle stated that if the plant was left bushy a greater yield of green tomatoes would result, but if ripe tomatoes were desired only a single stem should be left on the plant. The short growing season that we have makes it necessary that the natural growth of the plant be limited in order that the fruit may be ripened. Although all side shoots should be kept pinched off during the season, so as to have but the one main stem, it should not be inferred that leaves growing on the main stem should also be pinched off, for such is not the case, as the leaves are necessary for

plant growth.

The plants are staked at time of planting or as soon after as is possible and while 2 x 2 inch stakes have been used, 1 x 2 inch stakes would be suitable. These are made six feet long and driven about eighteen inches into the ground. As the plant develops it is tied to the stake with raffia or binder twine to keep it erect and keep the fruit off the ground.

Each plant is permitted to set six or seven clusters of fruit, each of which will have seven to fifteen fruitlets depending largely on the variety. In each cluster is set by the end of July a seventh is permitted to form but otherwise only six are left. When the last desired cluster is set the terminal bud is pinched off to prevent further growth and turn all the energy of the plant into developing and ripening the fruit.

At a nominating convention held at Corson on Saturday, May 25, Lorne Proudfoot, present member for the provincial constituency of Acadia, was nominated to represent the U.F.A. in the forthcoming elections.

DON. MACRAE

The accompanying chart shows how the price of gasoline to the retailer has decreased and the gasoline tax has increased since 1924. The data for this graph are based on figures published by the Canadian Bureau of Statistics.

LOWER PRICES — HIGHER QUALITY

EVER since 1920 the price of gasoline has steadily declined. Few people realize this however because during the past ten years as the price dropped the tax increased. In 1923 there was no provincial gasoline tax and the average price of gasoline to retail dealers across Canada was 27½ cents per gallon. Today the average price of gasoline to retailers is 18½ cents but to this is added a tax of from six to eight cents per gallon, which goes directly to the provincial governments. Not only has the price of gasoline fallen steadily since 1920 but the quality has

consistently improved. The gasoline consumer today gets more value than ever before.

Sometimes you hear talk of large profits earned by the gasoline refiner. In 1934 Imperial Oil earned \$62,400,127. This may seem to be a large sum but to this Imperial Oil had to make and market gasoline and other products amounting in value to \$82,841,311.15. That is to say Imperial Oil's earnings were relatively no greater than those of a merchant who, selling \$8,280 worth of goods in the course of a year, made a net profit of \$300.

IMPERIAL OIL LIMITED
